|                                       | Vulnerable<br>Structures | None     | None   | None  | Light    | Moderate | Mod./Heavy  | Heavy      | V. Heavy | V. Heavy |

<sup>\*</sup>Estimated exposure only includes population within the map area.

# Population Exposure

#### **Structures**

Overall, the population in this region resides in structures that are highly resistant to earthquake shaking, though some vulnerable structures exist. The predominant vulnerable building types are reinforced masonry and unreinforced brick with timber floor construction.

## **Historical Earthquakes**

| Date       | Dist. | Mag. | Max       | Shaking |
|------------|-------|------|-----------|---------|
| (UTC)      | (km)  |      | MMI(#)    | Deaths  |
| 2007-12-20 | 165   | 6.6  | VI(12k)   | 0       |
| 1987-03-02 | 239   | 6.5  | VIII(16k) | 0       |
| 2004-07-18 | 277   | 5.4  | V(1k)     | 1       |

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.

### Selected City Exposure

from GeoNames.org

MMI City Population

bold cities appear on map.

(k = x1000)

PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty.
